These forward-looking statements speak only as of the date on which such statements are made and are subject to various risks and uncertainties, many of which are outside the Company’s control. Should one or more of these risks or uncertainties materialize, or should any of the underlying assumptions prove incorrect, actual results may differ materially from those predicted in the forward-looking statements and from past results, performance, or achievements. Therefore, you should not place undue reliance on such statements. Factors that could cause actual results to differ materially from those in the forward-looking statements include (but are not limited to) the factors and risks described in the Company’s annual report on Form 20-F for the financial year ended December 31, 2018 and other documents filed from time to time with the SEC, which are available on the SEC’s website at www.sec.gov and on the investor relations section of the Company’s website at www.IGT.com. Non-GAAP Financial Measures

This presentation contains non-GAAP financial measures, including adjusted EBITDA, adjusted diluted EPS, and free cash flow. Reconciliations of non-GAAP measures to the most directly comparable GAAP measures are included in the appendix to this presentation.

Comparability of Results

All figures presented in this presentation are prepared under U.S. GAAP, unless noted otherwise.

Adjusted figures exclude the impact of items such as purchase accounting, impairment charges, restructuring expense, foreign exchange, and certain one-time, primarily transaction-related items. Reconciliations to the most directly comparable U.S. GAAP measures are included in the tables in this presentation. Constant currency changes for 2019 are calculated using the same foreign exchange rates as the corresponding 2018 period.

Management uses non-GAAP financial measures to understand and compare operating results across accounting periods, for internal budgeting and forecasting purposes, and to evaluate the Company’s financial performance. Management believes these non-GAAP financial measures reflect the Company’s ongoing business in a manner that allows for meaningful period-to-period comparisons and analysis of business trends. These constant currency changes and non-GAAP financial measures should however be viewed in addition to, and not as an alternative for, the Company’s reported results prepared in accordance with U.S. GAAP.
