It does not include Federal Reserve Discount Window or Federal Home Loan Bank borrowing capacity. Transfers of liquidity among legal entities may be subject to certain regulatory and other restrictions.
- B In 4Q23, the FDIC imposed a special assessment to recover losses to the Deposit Insurance Fund arising from the protection of uninsured depositors of Silicon Valley Bank and Signature Bank associated with their closures. Accordingly, the Corporation recorded pretax noninterest expense of \$2.1B in 4Q23 for its estimated assessment amount. Additionally, the Corporation recorded a net pretax charge of \$1.6B in 4Q23 to noninterest income related to interest rate swaps used in cash flow hedges of certain loans that are indexed to the Bloomberg Short-Term Bank Yield Index (BSBY) following the 4Q23 announcement that BSBY would permanently cease effective November 15, 2024. The Corporation has presented certain non-GAAP financial measures (labeled as “adj.” in the tables below) that exclude the impacts of the FDIC special assessment (FDIC SA) and / or the BSBY charge, and has provided a reconciliation of these non-GAAP financial measures as set forth below. The Corporation believes the use of non-GAAP financial measures adjusting for the impact of the FDIC SA and the BSBY charge provide additional information for evaluating its results of operations and comparing its operational performance between periods by excluding these impacts that may not be reflective of its underlying operating performance.

- C Reserve build (or release) is calculated by subtracting net charge-offs for the period from the provision for credit losses recognized in that period. The period-end allowance, or reserve, for credit losses reflects the beginning of the period allowance adjusted for net charge-offs recorded in that period plus the provision for credit losses and other valuation accounts recognized in that period.

Note: Amounts may not total due to rounding.

<sup>1</sup> Represents a non-GAAP financial measure. For more information and a reconciliation to GAAP, see note D on slide 33. For important presentation information, see slide 36.

<sup>2</sup> Calculated as net income applicable to common shareholders divided by average diluted common shares. Average diluted common shares of 8,081MM and 8,062MM for 2023 and 4Q23.

<sup>3</sup> Calculated as net income divided by average assets. Average assets were \$3,154B and \$3,213B for 2023 and 4Q23.

<sup>4</sup> Calculated as net income applicable to common shareholders divided by average common shareholders' equity. Average common shareholders' equity was \$255B and \$260B for 2023 and 4Q23.

<sup>5</sup> Calculated as net income applicable to common shareholders divided by average tangible common shareholders' equity. Average tangible common shareholders' equity was \$185B and \$190B for 2023 and 4Q23. Average tangible common shareholders' equity represents a non-GAAP financial measure. For important presentation information on non-GAAP measures, see slide 36.

<sup>6</sup> Calculated as noninterest expense divided by revenue, net of interest expense.

# Notes

<sup>D</sup> Pretax, pre-provision income (PTPI) at the consolidated level is a non-GAAP financial measure calculated by adjusting consolidated pretax income to add back provision for credit losses. Similarly, PTPI at the segment level is a non-GAAP financial measure calculated by adjusting the segments' pretax income to add back provision for credit losses. Management believes that PTPI (both at the consolidated and segment level) is a useful financial measure as it enables an assessment of the Corporation's ability to generate earnings to cover credit losses through a credit cycle as well as provides an additional basis for comparing the Corporation's results of operations between periods by isolating the impact of provision for credit losses, which can vary significantly between periods. See reconciliation below.

<sup>E</sup> Interest rate sensitivity as of December 31, 2024, reflects the potential pretax impact to forecasted net interest income over the next 12 months from December 31, 2024, resulting from an instantaneous parallel shock to the market-based forward curve. As part of our asset and liability management activities, we use securities, certain residential mortgages, and interest rate and foreign exchange derivatives in managing interest rate sensitivity. The sensitivity analysis assumes that we take no action in response to this rate shock and does not assume any change in other macroeconomic variables normally correlated with changes in interest rates. The sensitivity analysis incorporates potential movements in customer behavior that could result in changes in both total customer deposit balances and balance mix in various interest rate scenarios. In lower rate scenarios, the analysis assumes that a portion of higher-yielding deposits or market-based funding are replaced with low-cost or noninterest-bearing deposits.

<sup>F</sup> Revenue for all periods included net debit valuation adjustments (DVA) on derivatives, as well as amortization of own credit portion of purchase discount and realized DVA on structured liabilities. Net DVA gains (losses) were (\$19MM), (\$8MM), and (\$132MM) for 4Q24, 3Q24, and 4Q23, respectively, and (\$113MM), (\$236MM), \$20MM, and (\$54MM) for 2024, 2023, 2022, and 2021, respectively. Net DVA gains (losses) included in FICC revenue were (\$18MM), (\$8MM), and (\$127MM) for 4Q24, 3Q24, and 4Q23, respectively, and (\$97MM), (\$226MM), \$19MM, and (\$49MM) for 2024, 2023, 2022, and 2021, respectively. Net DVA gains (losses) included in Equities revenue were (\$1MM), \$0, and (\$5MM) for 4Q24, 3Q24, and 4Q23, respectively, and (\$16MM), (\$10MM), \$1MM, and (\$5MM) for 2024, 2023, 2022, and 2021, respectively.

<sup>G</sup> VaR model uses a historical simulation approach based on three years of historical data and an expected shortfall methodology equivalent to a 99% confidence level. Using a 95% confidence level, average VaR was \$38MM, \$39MM, and \$42MM for 4Q24, 3Q24, and 4Q23 respectively, and \$42MM, \$41MM, \$36MM, and \$28MM for 2024, 2023, 2022, and 2021, respectively.

# Forward-Looking Statements

Bank of America Corporation (the Corporation) and its management may make certain statements that constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as “anticipates,” “targets,” “expects,” “hopes,” “estimates,” “intends,” “plans,” “goals,” “believes,” “continue” and other similar expressions or future or conditional verbs such as “will,” “may,” “might,” “should,” “would” and “could.” Forward-looking statements represent the Corporation’s current expectations, plans or forecasts of its future results, revenues, liquidity, net interest income, provision for credit losses, expenses, efficiency ratio, capital measures, strategy, deposits, assets, and future business and economic conditions more generally, and other future matters. # Important Presentation Information

- The information contained herein is preliminary and based on Corporation data available at the time of the earnings presentation. It speaks only as of the particular date or dates included in the accompanying slides. Bank of America does not undertake an obligation to, and disclaims any duty to, update any of the information provided.
- The Corporation may present certain metrics and ratios, including year-over-year comparisons of revenue, noninterest expense, and pretax income, excluding certain items (e.g., DVA) that are non-GAAP financial measures. The Corporation believes the use of these non-GAAP financial measures provides additional clarity in understanding its results of operations and trends. For more information about the non-GAAP financial measures contained herein, please see the presentation of the most directly comparable financial measures calculated in accordance with GAAP and accompanying reconciliations in the earnings press release for the quarter and year ended December 31, 2024, and other earnings-related information available through the Bank of America Investor Relations website at: <https://investor.bankofamerica.com/quarterly-earnings>, the content of which is not incorporated by reference into this presentation.
- The Corporation presents certain key financial and nonfinancial performance indicators (KPIs) that management uses when assessing consolidated and / or segment results. The Corporation believes this information is useful because it provides management with information about underlying operational performance and trends. KPIs are presented herein, including in the 2024 Highlights on slide 2, Financial Results on slide 5, and on the Summary Income Statement for each segment.
- The Corporation also views net interest income and related ratios and analyses on a fully taxable-equivalent (FTE) basis, which when presented on a consolidated basis are non-GAAP financial measures. The Corporation believes managing the business with net interest income on an FTE basis provides investors with meaningful information on the interest margin for comparative purposes. The Corporation believes that the presentation allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices. The FTE adjustment was \$154MM, \$147MM, \$160MM, \$158MM, and \$145MM for 4Q24, 3Q24, 2Q24, 1Q24, and 4Q23, respectively.
- The Corporation allocates capital to its business segments using a methodology that considers the effect of regulatory capital requirements in addition to internal risk-based capital models. Allocated capital is reviewed periodically and refinements are made based on multiple considerations that include, but are not limited to, risk-weighted assets measured under Basel 3 Standardized and Advanced approaches, business segment exposures and risk profile, and strategic plans. As a result of this process, in the first quarter of 2024, the Corporation adjusted the amount of capital being allocated to its business segments.
