Regional improvement initiatives

Rogaland

- Post smolt to reduce time in sea, improve biology, higher utilization of MAB and lower cost
- Time in sea below 12 months
- Increase VAP capacity
- Cost improvement initiatives developing according to plan. Risk related to external cost inflation

Finnmark

- Mitigation to reduce biological risk of ISA and winter ulcers
 - Vaccination, change of timing of transferring smolt to sea and feed composition
 - Add 4,000 tonnes of post smolt capacity by 2025
- Increase VAP capacity
- Improve capacity utilization (MAB)
- Cost improvement initiatives developing according to plan. Risk related to external cost inflation

British Columbia

- Algae mitigation, digital monitoring and aeration systems
- Increase smolt capacity from 500 to 900 tonnes at the Gold River smolt facility
- Develop our business in farming areas under agreements with First Nations
- Increase VAP capacity
- Cost improvement initiatives developing according to plan. Risk related to external cost inflation

Post-smolt strategy core to improve profitability

Overall objectives of post smolt strategy

- Improve biological control, fish welfare, survival and quality
- Minimize or avoid expensive treatments by reducing time in sea from 18 months to 12 months
- Increase flexibility and allow for more efficient production cycle

Rogaland early mover in post-smolt

- Gradual increase in average weight of smolt released to sea
- More than 50% of fish harvested are now from post-smolt, increasing to above 90% by 2024
- Reduction in treatments and reduced risk of PD for post-smolt fish that spend less than 12 months in sea
- Post-smolt with an average weight of approx 900 gr transferred to sea end of March had an average weight of 4.8 kg when harvested end of November

VAP strategy

Downstream priorities

- Continued strengthening of processing capacity - evaluating external and internal opportunities
 - Developing long term partnerships with third parties in Norway, Europe and North America
 - Developing existing internal processing infrastructure
 - Contributes to improved price achievement and reduced volatility

Great development and performance by in-house sales and market organization

- Internal sales and market department sells 100% of our volume
 - Positive market performance
- Internal VAP sales department
 - Key contributor to increase our VAP product portfolio from Norwegian and Canadian origin

Repositioning from being a supplier
to an innovative partner

OPERATIONS

GSF Rogaland

- Price achievement impacted by production graded fish, mainly due to PD
 - However, share of superior quality fish increased from 83% in Q4 2020 to 85% in Q4 2021
- Farming cost impacted by harvesting from PD-affected sites and related transport cost
 - Over time, increased share of post-smolt with shorter time in sea will lower the risk of PD
- First sites to be ASC certified in 2022
- Harvest target of 30,000 tonnes in 2022
 - Strong production with increased survival
 - Continued trend of few sea lice treatments due to preventative measures
- Expect harvest of 8,000 tonnes in Q1 2022, with stable cost per kg
 - Harvesting of remaining two PD-affected sites impact quality
 - Harvesting skewed towards March

OUTLOOK & CONCLUDING REMARKS

Outlook

Sales & Market

- Expect no global supply growth in 2022
- Salmon demand still partly impacted by volumes channelled from HoReCa to retail. US market is close to normal
- Expect markets to normalize, might see temporary lockdowns and elevated freight prices
- In combination with tight global supply, we expect good market prices
- Positive impact from our improved VAP capacity
- Estimate contract share of 16% of Norwegian harvest volume for Q1 2022 and 17% for 2022

Farming operations

- Good biological production in all regions so far in Q1 2022
- Stable farming cost in Rogaland, higher farming cost in Finnmark short term due to lower volume
- Declining cost level in BC
- External cost inflation may impact cost development
- Continued optimization of production, focusing on fish health and welfare
- Gradual development of Newfoundland

Guiding (tonnes GWT)	Rogaland	Finnmark	BC	GSF Group
Total 2021	26,700	34,500	14,500	75,700

<i>Growth y-o-y</i>	12%	10%	52%	19%

Summary

- Solid earnings driven by high market prices and declining operational cost
- Strong operational performance, with increased survival in all regions and good cost development
- Cost improvement initiatives according to plan. Risk related to external cost inflation
- Commenced value-added processing activities as a step towards repositioning the company in the market
- Solid financial position to execute strategic priorities and deliver shareholder return
- Expect a strong market going forward
