OUR DELINQUENCY AND NET CHARGE-OFF TRENDS HAVE REMAINED STABLE FOR 8 YEARS

Percentage of Loans Considered "Current"

Percentage of Net Charge-Offs to Average Loans

The low charge-off rate in 2019 and 2020 was due to large recoveries.

THE INCREASE IN NPAS IN Q3 2021 WAS MAINLY DUE TO ACQUISITION OF PREMIER FINANCIAL BANCORP, INC.*

NONPERFORMING ASSETS

*The accounting for purchased credit deteriorated loans under ASU 2016-13 resulted in the movement of \$3.9 million of loans from the 90+ days past due and accruing category to the nonaccrual category on January 1, 2020. As of December 31, 2019, these loans were presented as 90+ days past due and accruing, although they were not accruing interest income, because they were accruing income from the discount that was recognized due to acquisition accounting. The change in NPA's for the quarter ended September 30, 2021 was a result of \$11.1M of OREO property acquired from Premier Financial Bancorp, Inc.

CLASSIFIED AND CRITICIZED LOANS AS A PERCENTAGE OF TIER 1 CAPITAL ARE WELL MANAGED.

PRE-PROVISION NET REVENUE

Pre-provision net revenue (PPNR) has become a key financial measure used by federal bank regulatory agencies when assessing the capital adequacy of financial institutions. PPNR is defined as net interest income plus total non-interest income (excluding all gains and losses) minus total non-interest expense and, therefore, excludes the provision for loan losses and all gains and/or losses included in earnings. PPNR excludes income tax expense. As a result, PPNR represents the earnings capacity that can be either retained in order to build capital or used to absorb unexpected losses and preserve existing capital.

EFFICIENCY RATIO AND ADJUSTED FOR NON-CORE ITEMS

The efficiency ratio is a key financial measure used to monitor performance. The efficiency ratio is calculated as total non-interest expense (less amortization of other intangible assets) as a percentage of fully tax-equivalent net interest income plus total non-interest income excluding all gains and losses. This measure in non-US GAAP since it excludes amortization of other intangible assets, and all gains and/or losses included in earnings, and uses fully tax-equivalent net interest income. The efficiency ratio adjusted for non-core items is non-US GAAP since it excludes amortization of other intangible assets, non-core expenses, system upgrade revenue waived and all gains and/or losses included in earnings, and uses fully tax-equivalent net interest income.

APPENDIX NON-US GAAP MEASURES

NASDAQ: PEBO

TANGIBLE EQUITY TO TANGIBLE ASSETS AND TANGIBLE BOOK VALUE PER SHARE

Peoples uses tangible capital measures to evaluate the adequacy of Peoples' stockholders'. Such ratios represent non-US GAAP financial measures since the calculation removes the impact of goodwill and other intangible assets acquired through acquisitions on both total stockholders' equity and total assets. Management believes this information is useful to investors since it facilitates the comparison of Peoples' operating performance, financial condition and trends to peers, especially those without a level of intangible assets similar to that of Peoples. The following table reconciles the calculation of these non-US GAAP financial measures to amounts reported in Peoples' consolidated financial statements.

RETURN ON AVERAGE TANGIBLE STOCKHOLDERS' EQUITY

The return on average tangible stockholders' equity ratio is a key financial measure used to monitor performance. It is calculated as net income (less after-tax impact of amortization of other intangible assets) divided by average tangible stockholders' equity. This measure is non-US GAAP since that excludes the after-tax impact of amortization of other intangible assets from earnings and the impact of goodwill and other intangible assets acquired through acquisitions on total stockholders' equity.
