Executing on Plans to Reposition the Business

Divestitures

- Full Service Retirement business⁽¹⁾
- PALAC traditional Variable Annuity block⁽¹⁾

Acquisitions

- Programmatic acquisitions and investments in asset management and emerging markets:
 - Alexander Forbes⁽²⁾

Business Investment

- Enhance customer experience through digital tools
- Expand solutions to support sustainable growth

Becoming a higher growth, less market sensitive company

(1) Completed sales of the Full Service Retirement business and the PALAC traditional Variable Annuity block in April 2022.
(2) Expected to complete acquisition of strategic minority interest of Alexander Forbes in South Africa in 2Q22.

On Track to Achieve \$750 Million of Cost Savings

(\$ in millions)

Reducing costs while improving employee and customer experience

Note: Realized cost savings of ~\$170 million in 1Q22.

Rock Solid Balance Sheet Provides Financial Flexibility

Maintain robust balance sheet position

- Well-diversified investment portfolio
- Capital continues to support AA rating level as of March 31, 2022
- Highly liquid assets of \$3.6 billion⁽¹⁾
- Proceeds from divestitures of over \$4 billion received in 2Q22

Return \$11 billion of capital to shareholders (2021 to 2023)

- Returned over \$800 million in 1Q22⁽²⁾
- Increased our dividend by 4% in 1Q22
– 14th consecutive annual dividend increase

Creating sustainable, profitable growth and shareholder returns

(1) Highly liquid assets predominantly include cash, short-term investments, U.S. Treasury securities, obligations of other U.S. government authorities and agencies, and/or foreign government bonds.
(2) Capital returned to shareholders in the first quarter of \$837 million includes share repurchases of \$375 million and dividends of \$462 million.

First Quarter 2022 Highlights

Financial Highlights

(\$ millions, except per share amounts)

	<u>1Q22</u>
Pre-Tax Adjusted Operating Income⁽¹⁾	\$1,566
Adjusted Operating Income Per Share⁽¹⁾	\$3.17
GAAP Net Loss Per Share⁽²⁾	(\$0.10)
Adjusted Operating ROE⁽³⁾	11.8%
Adjusted Book Value Per Share⁽¹⁾	\$107.16

Earnings Drivers

(\$ millions, pre-tax adjusted operating income)

<u>PGIM</u>	<u>U.S. Businesses</u>	<u>International Businesses</u>
+ Higher asset management fees	+ Higher spread income	+ Business growth
- Lower Other Related Revenues	+ More favorable underwriting	- Lower spread income
- Higher expenses	+ Lower expenses	- Less favorable underwriting
- Gain on sale of Italy JV in 1Q21	- Lower fee income	- Lower JV earnings

Note: See Appendix for segment results. Prior period restated for reclassification of results of Full Service Retirement. Adjusted operating income reflects the reclassification of results of Full Service Retirement from the Retirement business to Divested and Run-off Businesses in Corporate & Other. Full Service Retirement results are excluded from adjusted operating income as a result of the operation being held-for-sale.

(1) See reconciliation in Appendix for non-GAAP measures Adjusted Operating Income, Adjusted Operating Income Per Share, and Adjusted Book Value Per Share.

(2) Includes impacts of realized investment losses and losses from divested and run-off businesses, driven by the increase in interest rates.

(3) Based on year-to-date 2022 after-tax Adjusted Operating Income and average Adjusted Book Value. See Appendix for more information.

PGIM

Active Global Investment Manager Across a Broad Range of Private and Public Asset Classes

Earnings Contribution to Prudential

Trailing twelve months⁽¹⁾
(\$ millions)

3rd Party Net Flows

(\$ billions)

Key Priorities

- Maintain strong investment performance⁽²⁾
 - Percentage of AUM⁽³⁾ outperforming public benchmarks:
3 Year: 84%, 5 Year: 95%, 10 Year: 85%
- Capture synergies with broader Prudential enterprise and leverage scale to drive operating leverage
- Globalize both product and client footprint and continue to add capabilities
- Grow in alternatives, including private credit, and other high margin areas
- Selectively acquire new capabilities through programmatic M&A

Asset Management Fees

Trailing twelve months
(\$ millions)

(1) Based on pre-tax adjusted operating income excluding Corporate & Other operations.

(2) PGIM calculations as of March 31, 2022 for \$802 billion of third-party AUM managed against public benchmarks. Past performance is not a guarantee or reliable indicator of future results. All investments involve risk, including the possible loss of capital. Performance is defined as outperformance (gross of fees) relative to each individual strategy's respective benchmark(s).

(3) Represents PGIM's benchmarked AUM (77% of total third-party AUM is benchmarked over 3 years, 68% over 5 years, and 44% over 10 years). This calculation does not include non-benchmarked assets (including general account assets and assets not managed by PGIM). Returns are calculated gross of investment management fees, which would reduce an investor's net return. Excess performance is based on all actively managed Fixed Income, Equity, and Real Estate AUM for Jennison Associates, PGIM Fixed Income, PGIM Quantitative Solutions, PGIM Real Estate, PGIM Private Capital, PGIM Global Partners, and PGIM Real Estate Finance. Due to timing, performance for some real estate funds is preliminary.

Forward-Looking Statements

Certain of the statements included in this presentation, including those regarding our plans to reposition our business and become a higher growth, less market sensitive company, expected cost savings, the planned transaction involving Alexander Forbes, our plans relating to share repurchases and dividends, our environmental sustainability initiatives and climate change commitments, and those under the headings “Key Priorities”, “Adjusted Operating Income & EPS Considerations”, “Adjusted Operating Income Rollforward by Business,” and “Seasonality of Key Financial Items” constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as “expects”, “believes”, “anticipates”, “includes”, “plans”, “assumes”, “estimates”, “projects”, “intends”, “should”, “will”, “shall”, or variations of such words are generally part of forward-looking statements. Forward-looking statements are made based on management’s current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. Prudential Financial, Inc.’s actual results may differ, possibly materially, from expectations or estimates reflected in such forward-looking statements. Certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements can be found in the “Risk Factors” and “Forward-Looking Statements” sections included in Prudential Financial, Inc.’s Annual Reports on Form 10-K and Quarterly Reports on Form 10-Q. Each of our forward-looking statements contained herein is subject to the risk that we will be unable to execute our strategy and other risks. In addition, our statements under the heading “Seasonality of Key Financial Items” are subject to the risk that different earnings and expense patterns will emerge. Prudential Financial, Inc. does not undertake to update any particular forward-looking statement included in this presentation.

Prudential Financial, Inc. of the United States is not affiliated with Prudential plc which is headquartered in the United Kingdom.

Non-GAAP Measures

This presentation includes references to adjusted operating income, adjusted book value, and adjusted operating return on equity, which is based on adjusted operating income and adjusted book value. Consolidated adjusted operating income, adjusted book value, and adjusted operating return on equity are not calculated based on accounting principles generally accepted in the United States of America (GAAP). For additional information about adjusted operating income, adjusted book value, and adjusted operating return on equity and the comparable GAAP measures, including reconciliations between the comparable measures, please refer to our quarterly results news releases, which are available on our website at www.investor.prudential.com. Reconciliations are also included as part of this presentation.

Our 2Q22 earnings rollforward is based on adjusted operating income. Due to the inherent difficulty in reliably quantifying future realized investment gains/losses and changes in asset and liability values given their unknown timing and potential significance, we cannot, without unreasonable effort, provide rollforward based on income from continuing operations, which is the GAAP measure most comparable to adjusted operating income.

We believe that our use of these non-GAAP measures helps investors understand and evaluate the Company's performance and financial position. The presentation of adjusted operating income as we measure it for management purposes enhances the understanding of the results of operations by highlighting the results from ongoing operations and the underlying profitability of our businesses. Trends in the underlying profitability of our businesses can be more clearly identified without the fluctuating effects of the items described below. Adjusted book value augments the understanding of our financial position by providing a measure of net worth that is primarily attributable to our business operations separate from the portion that is affected by capital and currency market conditions, and by isolating the accounting impact associated with insurance liabilities that are generally not marked to market and the supporting investments that are marked to market through accumulated other comprehensive income under GAAP. However, these non-GAAP measures are not substitutes for income and equity determined in accordance with GAAP, and the adjustments made to derive these measures are important to an understanding of our overall results of operations and financial position.

Adjusted operating income is a non-GAAP measure used by the Company to evaluate segment performance and to allocate resources. Adjusted operating income excludes "Realized investment gains (losses), net," as adjusted, and related charges and adjustments. A significant element of realized investment gains and losses are impairments and credit-related and interest rate-related gains and losses. Impairments and losses from sales of credit-impaired securities, the timing of which depends largely on market credit cycles, can vary considerably across periods. The timing of other sales that would result in gains or losses, such as interest rate-related gains or losses, is largely subject to our discretion and influenced by market opportunities as well as our tax and capital profile.

Non-GAAP Measures (Continued)

Realized investment gains (losses) within certain businesses for which such gains (losses) are a principal source of earnings, and those associated with terminating hedges of foreign currency earnings and current period yield adjustments are included in adjusted operating income. Adjusted operating income generally excludes realized investment gains and losses from products that contain embedded derivatives, and from associated derivative portfolios that are part of an asset-liability management program related to the risk of those products. Adjusted operating income also excludes gains and losses from changes in value of certain assets and liabilities relating to foreign currency exchange movements that have been economically hedged or considered part of our capital funding strategies for our international subsidiaries, as well as gains and losses on certain investments that are designated as trading. Adjusted operating income also excludes investment gains and losses on assets supporting experience-rated contractholder liabilities and changes in experience-rated contractholder liabilities due to asset value changes, because these recorded changes in asset and liability values are expected to ultimately accrue to contractholders. Additionally, adjusted operating income excludes the changes in fair value of equity securities that are recorded in net income.

Adjusted operating income excludes market experience updates, reflecting the immediate impacts in current period results from changes in current market conditions on estimates of profitability, which we believe enhances the understanding of underlying performance trends. Adjusted operating income also excludes the results of Divested and Run-off Businesses, which are not relevant to our ongoing operations and discontinued operations and earnings attributable to noncontrolling interests, each of which is presented as a separate component of net income under GAAP. Additionally, adjusted operating income excludes other items, such as certain components of the consideration for acquisitions, which are recognized as compensation expense over the requisite service periods, as well as changes in the fair value of contingent consideration. Earnings attributable to noncontrolling interests is presented as a separate component of net income under GAAP and excluded from adjusted operating income. The tax effect associated with pre-tax adjusted operating income is based on applicable IRS and foreign tax regulations inclusive of pertinent adjustments.

Adjusted operating income does not equate to “Net income” as determined in accordance with U.S. GAAP. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and our definition of adjusted operating income may differ from that used by other companies. The items above are important to an understanding of our overall results of operations. However, we believe that the presentation of adjusted operating income as we measure it for management purposes enhances the understanding of our results of operations by highlighting the results from ongoing operations and the underlying profitability of our businesses. Trends in the underlying profitability of our businesses can be more clearly identified without the fluctuating effects of the items described above.

Adjusted book value is calculated as total equity (GAAP book value) excluding accumulated other comprehensive income (loss) and the cumulative effect of foreign currency exchange rate remeasurements and currency translation adjustments corresponding to realized investment gains and losses. These items are excluded in order to highlight the book value attributable to our core business operations separate from the portion attributable to external and potentially volatile capital and currency market conditions.
