Note: All metrics above exclude the I-45 SLF

(1) At March 31, 2023 and December 31, 2022, we had equity ownership in approximately 62% and 59%, respectively, of our investments

(2) The weighted-average annual effective yields were computed using the effective interest rates during the quarter for all debt investments at cost as of March 31, 2023, including accretion of original issue discount but excluding fees payable upon repayment of the debt instruments

(3) The weighted average annual effective yields on total investments were calculated by dividing total investment income, exclusive of non-recurring fees, by average total investments at fair value

(4) Includes CSWC debt investments only. Weighted average EBITDA metric is calculated using investment cost basis weighting. For both quarters ended March 31, 2023 and December 31, 2022, nine portfolio companies are excluded from this calculation due to a reported debt to adjusted EBITDA ratio that was not meaningful

(5) Includes CSWC debt investments only. Calculated as the amount of each portfolio company's debt (including CSWC's position and debt senior or pari passu to CSWC's position, but excluding debt subordinated to CSWC's position) in the capital structure divided by each portfolio company's adjusted EBITDA. Weighted average leverage is calculated using investment cost basis weighting. For both quarters ended March 31, 2023 and December 31, 2022, nine portfolio companies are excluded from this calculation due to a reported debt to adjusted EBITDA ratio that was not meaningful
