Cautionary Statement Regarding Forward-Looking Information

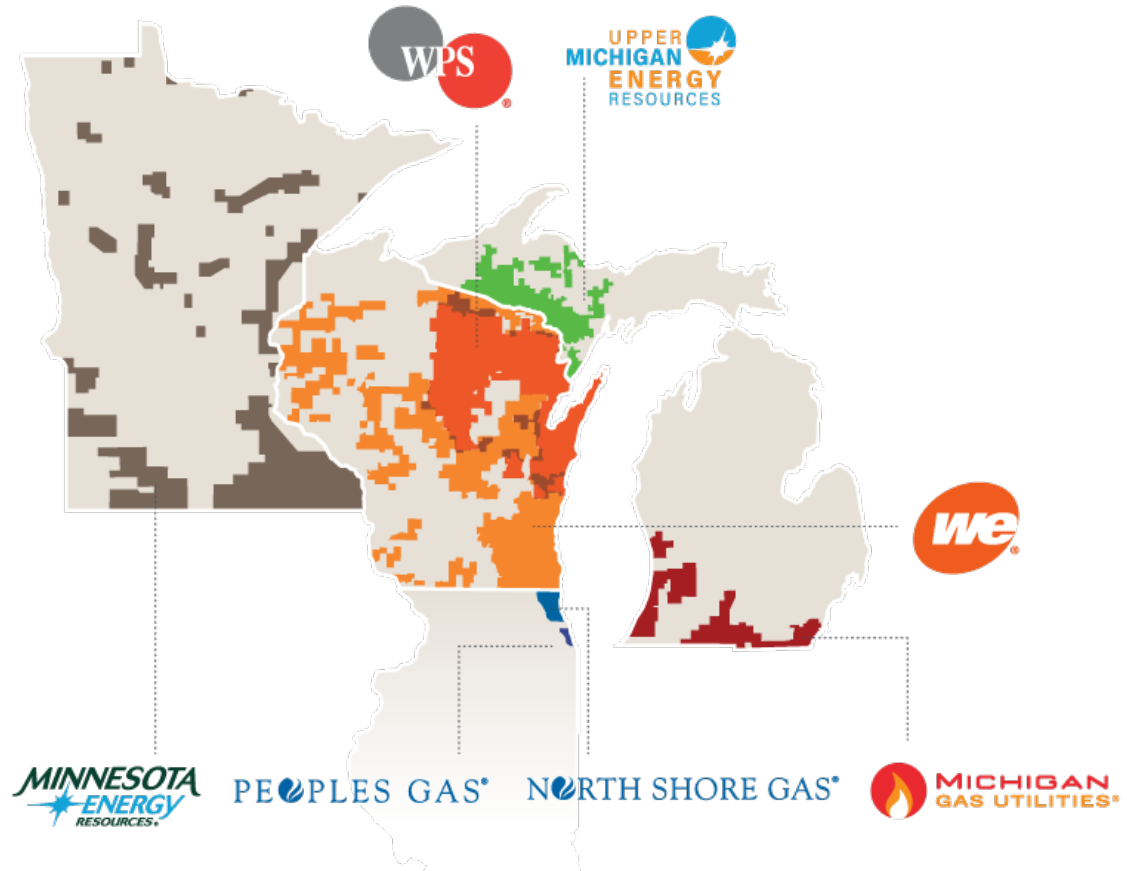

Much of the information contained in this presentation is forward-looking information based upon management's current expectations and projections that involve risks and uncertainties. Forward-looking information includes, among other things, information concerning earnings per share, rate case activity, earnings per share growth, cash flow, sources of revenue, dividend growth and dividend payout ratios, sales volumes, capital plans, construction costs, investment opportunities, corporate initiatives (including the ESG Progress Plan), rate base, and environmental matters (including emission reductions). Readers are cautioned not to place undue reliance on this forward-looking information. Forward-looking information is not a guarantee of future performance and actual results may differ materially from those set forth in the forward-looking information.

Factors that could cause actual results to differ materially from those contemplated in any forward-looking statements include, but are not limited to: general economic conditions, including business and competitive conditions in the company's service territories; timing, resolution and impact of rate cases and other regulatory decisions; the company's ability to continue to successfully integrate the operations of its subsidiaries; availability of the company's generating facilities and/or distribution systems; unanticipated changes in fuel and purchased power costs; key personnel changes; varying and severe weather conditions; continued industry restructuring and consolidation; continued advances in, and adoption of, new technologies that produce power or reduce power consumption; energy and environmental conservation efforts; electrification incentives, mandates and similar efforts; the company's ability to successfully acquire and/or dispose of assets and projects and to execute on its capital plan; cyber-security threats and data security breaches; construction risks; equity and bond market fluctuations; changes in the company's and its subsidiaries' ability to access the capital markets; changes in tax legislation or our ability to use certain tax benefits and carryforwards; federal, state, and local legislative and regulatory changes, including changes to environmental standards, the enforcement of these laws and regulations and changes in the interpretation of regulations by regulatory agencies; supply chain disruptions; inflation; political or geopolitical developments, including impacts on the global economy, supply chain and fuel prices, generally, from the ongoing conflict between Russia and Ukraine; the impact from any new developments relating to the COVID-19 pandemic or any future health pandemics; current and future litigation and regulatory investigations, proceedings or inquiries; changes in accounting standards; the financial performance of the American Transmission Company as well as projects in which the company's energy infrastructure business invests; the ability of the company to obtain additional generating capacity at competitive prices; goodwill and its possible impairment; and other factors described under the heading "Factors Affecting Results, Liquidity and Capital Resources" in Management's Discussion and Analysis of Financial Condition and Results of Operations and under the headings "Cautionary Statement Regarding Forward-Looking Information" and "Risk Factors" contained in WEC Energy Group's Form 10-K for the year ended December 31, 2021, and in subsequent reports filed with the Securities and Exchange Commission. Except as may be required by law, WEC Energy Group expressly disclaims any obligation to publicly update or revise any forward-looking information.

Modernizing Our Gas-Fueled Generation Fleet

Retiring

- 200 MW of older, less-efficient gas generation expected
- Target: 2024

Building

Weston RICE units

- Received regulatory approval on March 31
- 128 MW
- Expected investment: \$170 million
- Target in-service: 2023

Investing

West Riverside Energy Center combined-cycle

First Option: 100 MW*

- Expected investment: \$91 million
- Target: 2023

Additional 100 MW option**

- Expected investment: \$90 million
- Target: 2024

Whitewater combined-cycle

- Received regulatory approval on November 10
- Will remain under power purchase agreement until transaction closes
- Expected investment: \$75 million
- Target: 2023

* Filed and pending regulatory approval

** Pending due diligence and regulatory approval

Exiting Coal

- Near-term retirements planned:
 - Oak Creek Units 5-6: 528 MW (May 2024)
 - Oak Creek Units 7-8: 611 MW (late in 2025)
 - Columbia Units 1-2: 300 MW (by June 1, 2026)
- Enhancing fuel flexibility (gas blending) at Oak Creek Power the Future units
- By the end of 2030, we expect to use coal only as a backup fuel
- We plan to eliminate coal as an energy source by the end of 2035

American Transmission Company

WEC portion of investment from 2023-2027: \$2.0 billion

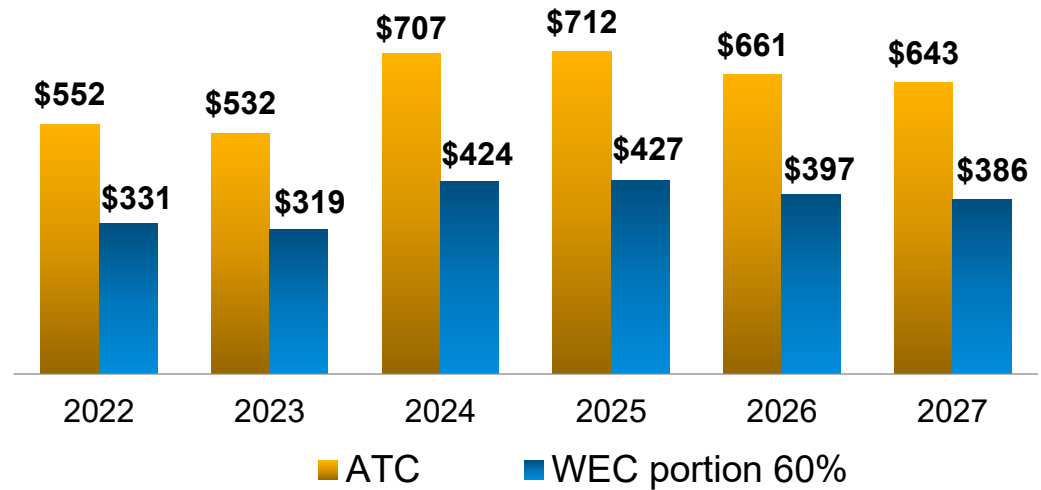

5-year (2023-2027) WEC projected capital investment:

- Ongoing ATC: \$1.7 billion
- Tranche 1 (2025-2027): \$0.3 billion

Future ATC Opportunity

- ATC's estimated investment in Tranche 1 is approximately \$900 million (2022 dollars).
- MISO Tranche 2:
 - Discussions underway

Projected Capital Expenditures (millions)

Hydrogen Pilot Program

- Led a pilot program – first of its kind in the world - to test hydrogen as a fuel source for power generation
 - Partnered with the Electric Power Research Institute (EPRI)
 - Blended hydrogen with natural gas at one of our RICE units
- Initial findings indicate that all project measures met or exceeded expectations
 - Units performed very well and efficiently

WEC Energy Group's *industry-leading* efforts could help create another viable option for decarbonizing the economy.

Carbon Reduction Goals – Electric Generation

Achieved and anticipated CO₂ reductions (net mass)*

Reduction goals:

60%
below 2005
levels by 2025

80%
below 2005
levels by the
end of 2030

**Net carbon
neutral**
by 2050

We have established ambitious greenhouse gas reduction goals for our electric generating fleet, aligned with or surpassing global emissions pathways aimed at limiting warming to 1.5°C.

*Includes projection of potential carbon offsets by 2050

Methane Reduction

Achieved* and **anticipated** methane emission reduction from natural gas distribution. Aligns with the effort to limit warming to 1.5°C.

Goal:

Net zero

by the year 2030**

Use of Renewable Natural Gas (RNG) will contribute significantly to our goal

* Represents a decrease in the rate of methane emissions, per mile, from the natural gas distribution lines in our network from a 2011 baseline.

** This goal applies to emissions from WEC Energy Group natural gas distribution companies calculated in accordance with EPA's 40 Code of Federal Regulations Part 98, Subpart W reporting rule.

Key Takeaways for WEC Energy Group

- Track record of top decile performance among regulated utilities
- Industry leading earnings quality
- ESG Progress Plan drives premium EPS growth of 6.5% to 7.0%
 - No need to issue equity through forecast period
 - 100% of capital allocated to regulated businesses or contracted renewables
 - Dividend growth projected to be in line with earnings growth
- Aggressive environmental goals in place
 - By the end of 2030, we expect to use coal only as a backup fuel
 - Exit from coal planned by the end of 2035
- Poised to deliver among the best risk-adjusted returns in the industry

Today and Tomorrow

Why Our Natural Gas Distribution Networks Matter

Our Service Area

- 65-78% of homes use natural gas for heating
- Growth continues as customers convert to natural gas

Hydrogen and RNG Opportunities

- Potential to blend
- Investment potential to convert existing distribution networks

Electric Conversion Debate

- Today, electric heat pumps in our region are substantially more costly than natural gas heating*
- Natural hedge in Wisconsin since we serve both electric and natural gas customers
- Currently participating in Low Carbon Resource Initiative and other electrification R&D

Weather in the map reflects (in Fahrenheit) actual temperatures reported by NOAA during the January 2019 polar vortex.

* Based on independent, third-party research for the region we serve.

New Liquefied Natural Gas (LNG) Storage Facilities

Taking Steps to Maintain Reliable and Affordable Service for Our Customers

LNG will provide a solution for Southeastern Wisconsin to meet peak customer demand on the coldest days of the year.

- We Energies received approval for two LNG facilities to address the need for additional natural gas supply in Wisconsin
- Total expected investment: \$370 million
- Construction in progress
- Targeted in-service date:
 - Bluff Creek LNG Facility: 2023
 - Ixonia LNG Facility: 2024

Efficiency, Growth and Sustainability Progress

Taking Steps to Maintain Reliable and Affordable Service for Our Customers

Electric delivery redesign/resilience

- Addressing aging infrastructure and system hardening
- Enhancing efficiencies and reducing operating costs
- Expect to spend \$3.6 billion (2023-2027) with continued investment over next decade

Efficiency, Growth and Sustainability Progress

Taking Steps to Maintain Reliable and Affordable Service for Our Customers

Natural Gas Safety Modernization

- Increasing capacity and reliability of natural gas service in our territories

Illinois

- Expected replacement of 2,000 miles of piping for safety and reliability in Chicago
- Project \$280 million-\$300 million annual average investment
- Illinois law authorizes rider through 2023
- Continued investment planned over next decade

\$18.2 billion projected capital spend from 2023-2027

Utility Capital Plan Drives EPS Growth

Depreciation at the utilities expected to average \$1.3 billion annually, and \$150 million at ATC, over the 2023-2027 period

* WEC Energy Group has provided adjusted earnings per share (non-GAAP earnings per share) as a complement to, and not as an alternative to, reported earnings per share presented in accordance with GAAP. Adjusted earnings per share exclude, as applicable, (1) a one-time reduction in income tax expense related to a revaluation of our deferred taxes as a result of the Tax Cuts and Jobs Act of 2017; (2) costs related to the acquisition of Integrys Energy Group; (3) the results of operations of Integrys and its subsidiaries; and (4) the additional shares of WEC Energy Group common stock that were issued as part of the acquisition. None of these items are indicative of WEC Energy Group's operating performance. Therefore, WEC Energy Group believes that the presentation of adjusted earnings per share is relevant and useful to investors to understand the company's operating performance. Management uses such measures internally to evaluate the company's performance and manage its operations.
