Non-GAAP Financial Measures

In addition to financial results reported in accordance with U.S. generally accepted accounting principles (“GAAP”), we have provided the following non-GAAP financial measures in this presentation, all reported on a continuing operations basis: EBITDA, Adjusted EBITDA, Adjusted EBITDA margin, LTM Adjusted EBITDA, Net Leverage Ratio, and Free Cash Flow. These non-GAAP financial measures are utilized by management in comparing our operating performance on a consistent basis between fiscal periods. We believe that these financial measures are appropriate to enhance an overall understanding of our underlying operating performance trends compared to historical and prospective periods and our peers. Management also believes that these measures are useful to investors in their analysis of our results of operations and provide improved comparability between fiscal periods. Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information calculated in accordance with GAAP. Our non-GAAP measures may be different from similarly titled measures of other companies. Investors are encouraged to review the reconciliation of these historical non-GAAP measures to their most directly comparable GAAP financial measures included in the appendix to this presentation.

Reconciliations of Non-GAAP Financial Measures

Adjusted EBITDA and Adjusted EBITDA Margin

EBITDA represents earnings before interest, taxes, depreciation and amortization, all on a continuing operations basis. Adjusted EBITDA is presented on a continuing operations basis and is defined as EBITDA (which represents earnings before interest, taxes, depreciation and amortization) adjusted for litigation; stock-based compensation expense; estimated sales tax expense, restructuring and other charges; loss on debt extinguishment; foreign currency gain or loss; litigation settlement gain; and other items that are unusual in nature, infrequently occurring or not considered part of our core operations, as set forth in the reconciliation in Exhibit E. Adjusted EBITDA is intended to show our unleveraged, pre-tax operating results and therefore reflects our financial performance based on operational factors, excluding non-operational, unusual or non-recurring losses or gains. Adjusted EBITDA has important limitations as an analytical tool, and you should not consider it in isolation, or as a substitute for, analysis of our results as reported under GAAP. For example, Adjusted EBITDA does not reflect: (a) our capital expenditures, future requirements for capital expenditures or contractual commitments; (b) changes in, or cash requirements for, our working capital needs; (c) the significant interest expenses or the cash requirements necessary to service interest or principal payments on our debt; (d) tax payments that represent a reduction in cash available to us; (e) any cash requirements for the assets being depreciated and amortized that may have to be replaced in the future; (f) the impact of earnings or charges resulting from matters that we and the lender under our credit agreement may not consider indicative of our ongoing operations; or (g) the impact of any discontinued operations. In particular, our definition of Adjusted EBITDA allows us to add back certain non-operating, unusual or non-recurring charges that are deducted in calculating net income, even though these are expenses that may recur, vary greatly and are difficult to predict and can represent the effect of long-term strategies as opposed to short-term results. In addition, certain of these expenses represent the reduction of cash that could be used for other purposes.

Free Cash Flow

We define Free Cash Flow as cash flow from operating activities (continuing operations) less capital expenditures. We use this metric in analyzing our ability to service and repay our debt. However, this measure does not represent funds available for investment or other discretionary uses since it does not deduct cash used to service our debt, nor does it reflect the cash impacts of our discontinued operations.
