— SILVER —

THE WORLD'S PREMIER SILVER MINING COMPANY

INVESTOR PRESENTATION // MARCH 2021

NASDAQ: PAAS
TSX: PAAS

CAUTIONARY NOTE

Non-GAAP Measures

This presentation of Pan American Silver Corp. and its subsidiaries (collectively, "Pan American", "Pan American Silver", the "Company", "we" or "our") refers to various non-GAAP measures, such as "AISC", "cash costs per ounce sold", "adjusted earnings" and "basic adjusted earnings per share", "total debt", "capital", "operating margin", "free cash flow" and "working capital". These measures do not have a standardized meaning prescribed by IFRS as an indicator of performance, and may differ from methods used by other companies. Silver segment Cash Costs and AISC are calculated net of credits for realized revenues from all metals other than silver, and are calculated per ounce of silver sold. Gold segment Cash Costs and AISC are calculated net of credits for realized silver revenues, and are calculated per ounce of gold sold. Consolidated Cash Costs and AISC are based on total silver ounces sold and are net of by-product credits from all metals other than silver.

Readers should refer to the "Alternative Performance (Non-GAAP) Measures" section of the Company's Management's Discussion and Analysis ("MD&A") for the period ended December 31, 2020, available at www.sedar.com.

Reporting Currency and Financial Information

Unless we have specified otherwise, all references to dollar amounts or \$ are to United States dollars.

Integration of Tahoe Resources Inc. ("Tahoe")

On February 22, 2019, the Company completed the transaction whereby we acquired all of the issued and outstanding shares of Tahoe ("Acquisition"). Tahoe was a mid-tier publicly traded precious metals mining company with ownership interests in a diverse portfolio of mines and projects including the following principal mines: La Arena and Shahuindo in Peru; Timmins West and Bell Creek in Canada (together "Timmins"); and Escobal in Guatemala, where operations have been suspended since June 2017 (together the "Acquired Mines"). The Company now operates three gold mines as a result of the Acquisition. Consequently, the Company's operations have been divided into

silver and gold segments for the purposes of our financial reporting, as described in the Company's MD&A for the period ended December 31, 2020. All 2019 production, operating and financial results of the Acquired Mines (including Cash Costs and AISC amounts) and included in the Company's consolidated results, reflect only the results from February 22, 2019 onwards. Further details of the Acquisition are provided in the "Acquisition of Tahoe" section of the MD&A for the period ended December 31, 2020.

Cautionary Note Regarding Forward Looking Statements and Information

Certain of the statements and information in this presentation constitute "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and "forward-looking information" within the meaning of applicable Canadian provincial securities laws. All statements, other than statements of historical fact, are forward-looking statements or information. Forward-looking statements or information in this presentation relate to, among other things, anticipated accretion to shareholder value from the Company's future developments; future financial and operational performance, including, but not limited to, future financial or operational performance, including our estimated production of silver, gold and other metals in 2021, our estimated Cash Costs, AISC and capital expenditures in 2021 and future operating margins and cash flow; the effect of any reductions or suspensions in our operations relating to the COVID-19 pandemic may have on our financial and operational results; the ability of Pan American to continue with its operations, or to successfully maintain our other operations on care and maintenance, if necessary, or to restart or ramp-up these operations efficiently or economically, or at all; anticipated accretion to shareholder value from the Company's future developments; the sufficiency of the Company's current working capital, anticipated operating cash flow or its ability to raise necessary funds; our expectations with respect to future metal prices and exchange rates; the impact of the Escobal mine on the Company's performance in the future; the anticipated capital expenditures and the timing thereof and the results of any future exploration, development or expansion programs, including, but not limited to, the La Colorada skarn discovery; whether the Company is able to maintain a strong financial condition and have sufficient capital, or have access to capital through our credit facility or otherwise, to sustain our business and operations; the presence and impact of COVID-19 on our workforce, suppliers and other essential resources and what effect those impacts, if they occur, would have on our business; and whether we will be successful and able to continue with our efforts to protect our personnel, communities and others in respect of our business.

These forward-looking statements and information reflect Pan American's current views with respect to future events and are necessarily based upon a number of assumptions that, while considered reasonable by Pan American, are inherently subject to significant operational, business, economic and regulatory uncertainties and contingencies. These assumptions include: the world-wide economic and social impact of COVID-19 is managed and the duration and extent of the COVID-19 pandemic is minimized or not long-term; successful restart or ramp-up of our suspended operations efficiently or economically, or at all; continuation of our operations at Timmins West and Bell Creek; tonnage of ore to be mined and processed; ore grades and recoveries; prices for silver, gold and base metals remaining as estimated; currency exchange rates remaining as estimated; capital, decommissioning and reclamation estimates; our mineral reserve and mineral resource estimates and the assumptions upon which they are based; prices for energy inputs, labour, materials, supplies and services (including transportation); no labour-related disruptions at any of our operations; no unplanned delays or interruptions in scheduled production; all necessary permits, licenses and regulatory approvals for our operations are received in a timely manner and can be maintained; our ability to secure and maintain title and ownership to properties and the surface rights necessary for our operations; our ability to comply with environmental, health and safety laws, particularly given the potential for modifications and expansion of such laws. The foregoing list of assumptions is not exhaustive.

The Company cautions the reader that forward-looking statements and information involve known and unknown risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such forward-looking statements or information contained in this presentation and the Company has made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: fluctuations in silver, gold, and base metal prices; fluctuations in prices for energy inputs; fluctuations in currency markets (such as the PEN, MXN, ARS, BOL, GTQ and CAD versus the USD); operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); risks relating to claims and legal proceedings involving or against the Company and our subsidiaries; risks relating to the credit worthiness or financial condition of suppliers, refiners and other parties with whom the

CONTINUED

Company does business; risk of liability relating to our past sale of the Quiruvilca mine in Peru; inadequate insurance, or inability to obtain insurance, to cover these risks and hazards; employee relations; relationships with and claims by the local communities and indigenous populations; availability and increasing costs associated with mining inputs and labour; the Company's ability to secure our mine sites or maintain access to our mine sites due to criminal activity, violence, or civil and labour unrest; the speculative nature of mineral exploration and development, including the risk of obtaining or retaining necessary licenses and permits; changes in national and local government, legislation, taxation, controls or regulations and political, legal or economic developments in Canada, the United States, Mexico, Peru, Argentina, Bolivia, Guatemala or other countries where the Company may carry on business, including legal restrictions relating to mining, such as those in Chubut, Argentina, the risk of expropriation, and the constitutional court-mandated ILO 169 consultation process in Guatemala; diminishing quantities or grades of mineral reserves as properties are mined; global financial conditions; the Company's ability to complete and successfully integrate acquisitions and to mitigate other business combination risks; challenges to, or difficulty in maintaining, the Company's title to properties and continued ownership thereof; the actual results of current exploration activities, conclusions of economic evaluations, and changes in project parameters to deal with unanticipated economic or other factors; increased competition in the mining industry for properties, equipment, qualified personnel, and their costs; having sufficient cash to pay obligations as they come due; the duration and effects of the coronavirus and COVID-19, and any other pandemics on our operations and workforce, and the effects on global economies and society; and those factors identified under the caption "Risks Related to Pan American's Business" in the Company's most recent Form 40-F and Annual Information Form filed with the United States Securities and Exchange Commission and Canadian provincial securities regulatory authorities, respectively. Although the Company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated, described, or intended. Investors are cautioned against attributing undue certainty or reliance on forward-looking statements or information. Forward-looking statements and information are designed to help readers understand Management's current views of our near and longer term prospects and may not be appropriate for other purposes. The Company does not intend, and

does not assume any obligation, to update or revise forward-looking statements or information to reflect changes in assumptions or in circumstances or any other events affecting such statements or information, other than as required by applicable law.

Technical Information

Scientific and technical information contained in this presentation with respect to Pan American Silver Corp. has been reviewed and approved by Martin Wafforn, P.Eng., SVP Technical Services and Process Optimization, and Chris Emerson, FAusIMM, VP Business Development and Geology, who are Pan American's qualified persons for the purposes of Canadian National Instrument 43-101 ("NI 43-101"). Mineral reserves in this presentation were prepared under the supervision of, or were reviewed by, Martin Wafforn and Chris Emerson.

See Pan American's Annual Information Form dated February 17, 2021, available at www.sedar.com for further information on Pan American's material mineral properties as at December 31, 2020, including information concerning associated QA/QC and data verification matters, the key assumptions, parameters and methods used by the Pan American to estimate mineral reserves and mineral resources, and for a detailed description of known legal, political, environmental, and other risks that could materially affect Pan American's business and the potential development of Pan American's mineral reserves and resources.

Cautionary Note to U.S. Investors Concerning Estimates of Mineral Reserves and Resources

This presentation has been prepared in accordance with the requirements of Canadian securities laws, which differ from the requirements of U.S. securities laws. Unless otherwise indicated, all mineral reserve and mineral resource estimates included in this presentation have been prepared in accordance with Canadian National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") and the Canadian Institute of Mining, Metallurgy and Petroleum classification system. NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects.

Canadian public disclosure standards, including NI 43-101, differ significantly from the requirements of the United States Securities and Exchange Commission (the "SEC"), and information concerning mineralization, deposits, mineral reserve and mineral resource information contained or referred to herein may not be comparable to similar information disclosed by U.S. companies. In particular, and without limiting the generality of the foregoing, this presentation uses the terms "measured mineral resources", "indicated mineral resources", "inferred mineral resource estimate". U.S. investors are advised that, while such terms are recognized and required by Canadian securities laws, the SEC has not recognized them. The requirements of NI 43-101 for identification of "reserves" are not the same as those of the SEC, and mineral reserves reported by Pan American in compliance with NI 43-101 may not qualify as "reserves" under SEC standards. Under U.S. standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. U.S. investors are cautioned not to assume that any part of a "measured resource" or "indicated resource" will ever be converted into a "reserve". U.S. investors should also understand that "inferred resources" have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of "inferred resources" exist, are economically or legally mineable or will ever be upgraded to a higher category. Under Canadian securities laws, estimated "inferred resources" may not form the basis of feasibility or pre-feasibility studies except in rare cases. Disclosure of "contained ounces" in a mineral resource is permitted disclosure under Canadian securities laws. However, the SEC normally only permits issuers to report mineralization that does not constitute "reserves" by SEC standards as in place tonnage and grade, without reference to unit measures. Accordingly, information concerning mineral deposits set forth herein may not be comparable with information made public by companies that report in accordance with U.S. standards.

THE WORLD'S PREMIER SILVER MINING COMPANY

NASDAQ: PAAS // TSX: PAAS

Diversified asset portfolio with 9 operations in the Americas

Revenues from Peru (42%), Mexico (28%), Canada (20%), Argentina (6%) & Bolivia (4%) in 2020

Largest silver reserves globally

Mineral reserves of 550 M ounces of silver plus 5.2 M ounces of gold¹

3 large catalysts for growing shareholder value

Escobal, Guatemala – large, already-built silver mine with 264.5 M ounces of silver in reserves¹

La Colorada, Mexico – new discovery with estimated 100.4 M tonnes of inferred mineral resource¹

Navidad, Argentina – large undeveloped silver deposit with 632.3 M ounces of silver in measured and indicated resources¹

RESPONSIBLE MINING PRACTICES

ENVIRONMENTAL

- No significant environmental incidents at our operations
- Site-specific projects to reduce energy use, emissions and water intensity
- Independent dam safety reviews completed at all sites
- Implementing the TSM Tailings, Water Stewardship and Biodiversity Protocols

SOCIAL

- US\$2 million fund in support of communities during the COVID-19 pandemic; adoption of health and safety protocols across our operations
- Partnership with UNICEF to support children in Latin America
- Long-term socio-economic development programs in host communities
- Agreements in place with First Nations near our mines in Canada

GOVERNANCE

- Ethics and Compliance Program at all our operations
- Human Rights Policy in place and appointment of Human Rights Officer
- Alignment with the Voluntary Principles on Security and Human Rights
- Increased participation of women at board and workforce levels

2021 GUIDANCE¹

PRODUCTION

Silver: 22.5 – 24.0 Moz

Gold: 605.0 – 655.1 koz

AISC²

Silver segment: \$12.50 - \$14.00

Gold segment: \$1,135 - \$1,250

- For more information on the 2021 Guidance refer to the Jan. 19, 2021 news release.
- All-in sustaining costs per ounce (AISC) is a non-GAAP financial measures; see the "Non-GAAP Measures" section of our Cautionary Note on page 2 of this presentation. AISC forecasts assume average metal prices of \$23.50/oz for silver, \$1,825/oz for gold, \$2,700/tonne (\$1.22/lb) for zinc, \$1,900/tonne (\$0.86/lb) for lead, and \$7,400/tonne (\$3.36/lb) for copper; and average annual exchange rates relative to 1 USD of 20.00 for the Mexican peso ("MXN"), 3.50 for the Peruvian sol ("PEN"), 96.67 for the Argentine peso ("ARS"), 7.00 for the Bolivian boliviano ("BOB"), and \$1.30 for the Canadian dollar ("CAD").

- Revenue by Metal assumes the same average prices as those for AISC noted above.
- Mineral resources that are not mineral reserves have no demonstrated economic viability. Please refer to cautionary information on mineral reserve and resources on pages 2 to 4 of this presentation. The reserves by metal reflect the Company's 2020 mineral reserve estimates announced in the news release dated August 5, 2020 and metal price assumptions of \$18.00/oz for silver, \$1,300/oz for gold, \$2,350/tonne for zinc, \$2,000/tonne for lead, and \$6,000/tonne for copper; see presentation Appendix for more detailed information on the Company's reserves and resources.

PAN AMERICAN
— SILVER —

CONSOLIDATED HIGHLIGHTS

// 2020 in review

- Navigated impact of COVID-19, implementing measures to **protect health and safety** and to support workforce and communities
- Generated **record operating cash flow** of \$462.3 M
- Fully **repaid the revolving credit facility** and increased cash and short-term investment balances to \$279.1M at December 31, 2020
- **Doubled quarterly dividend** to \$0.07/share
- **Replaced 76% of the silver and 107% of the gold** mined for the 12-month period ended June 30, 2020, despite decreased exploration drilling due to COVID-19
- **Increased inferred mineral resource estimate** for the La Colorada skarn deposit to 100.4 Mt, containing an estimated 141 M oz of silver

CONSOLIDATED OPERATING PERFORMANCE

- **2020 production** largely impacted by **COVID-19** related mine suspensions and throughput restrictions.
- Underground silver producing mines more heavily impacted than open pit gold producing mines by COVID-19.
- Lack of access to high grade ore at La Colorada due to ventilation issues also significantly impacted 2020 silver production.
- **2021F record gold production** and a **~35% increase in silver production** vs 2020, with production and operating cash flow expected to increase towards the second half of the year.
- 2021F for AISC reflects ~\$50-60M of capital expenditures that were deferred from 2020 due to COVID-19.

1. All-in Sustaining Costs ("AISC") is a non-GAAP financial measure; see the "Non-GAAP Measures" section of our Cautionary Note on page 2 of this presentation.

2. AISC reflect Silver Segment operations and are calculated net of credits for realized revenues from all metals other than silver and are calculated per ounce of silver sold.

3. 2021 forecast provided in MD&A dated February 17, 2021.

4. AISC reflect Gold Segment operations and are calculated net of credits for realized revenues from all metals other than gold and are calculated per ounce of gold sold. Pan American's acquisition of Tahoe Resources Inc. closed on February 22, 2019, and significantly increased Pan American's gold production. As such, gold production and AISC for 2018 are excluded because they are not useful comparatives. 2019 production and AISC are subsequent to the February 22, 2019 closing date of the transaction.

STRONG FINANCIAL PERFORMANCE

1. Free Cash Flow is non-GAAP measure calculated as net increase (decrease) in cash and cash equivalents before dividend payments, share repurchases, expansion capital, M&A, short term investment payments and proceeds, debt repayments and proceeds and equity issuances. See the "Non-GAAP Measures" section of our Cautionary Note on page 2 of this presentation.

TAHOE TRANSACTION CONTRIBUTING TO STRONG FREE CASH FLOW¹

- Since transaction closed, \$424M in Free Cash Flow generated from acquired gold mines (“Gold Segment” operations)².
- Free Cash Flow generated represents ~37% of the acquisition cost in less than 2 years.
- Strong Free Cash Flow while gold price averaged \$1,582/oz since transaction close and during COVID-19 disruptions.

FREE CASH FLOW GENERATED BY GOLD SEGMENT MINES

February 22, 2019 - December 31, 2020

1. Free Cash Flow is a non-GAAP measure. See the “Non-GAAP Measures” section of our Cautionary Note on page 2 of this presentation. Gold Segment free cash flow is calculated as Operating Cash Flow less sustaining capital and excludes corporate overhead charges such as G&A costs, which are a deduction to the Company’s free cash flow, as presented in slide 11.
2. Pan American’s acquisition of Tahoe Resources Inc. closed on February 22, 2019.

FY 2020 CONSOLIDATED CASH FLOWS

* Excludes mine care and maintenance.

1. "STI" means short-term investments, "NCI" means non-controlling interests, and "D&A" means depreciation and amortization.
2. Net cash generated from operating activities before changes in working capital, interest and income taxes paid, and mine care and maintenance.

PAN AMERICAN
— SILVER —

LIQUIDITY AND CAPITAL POSITION

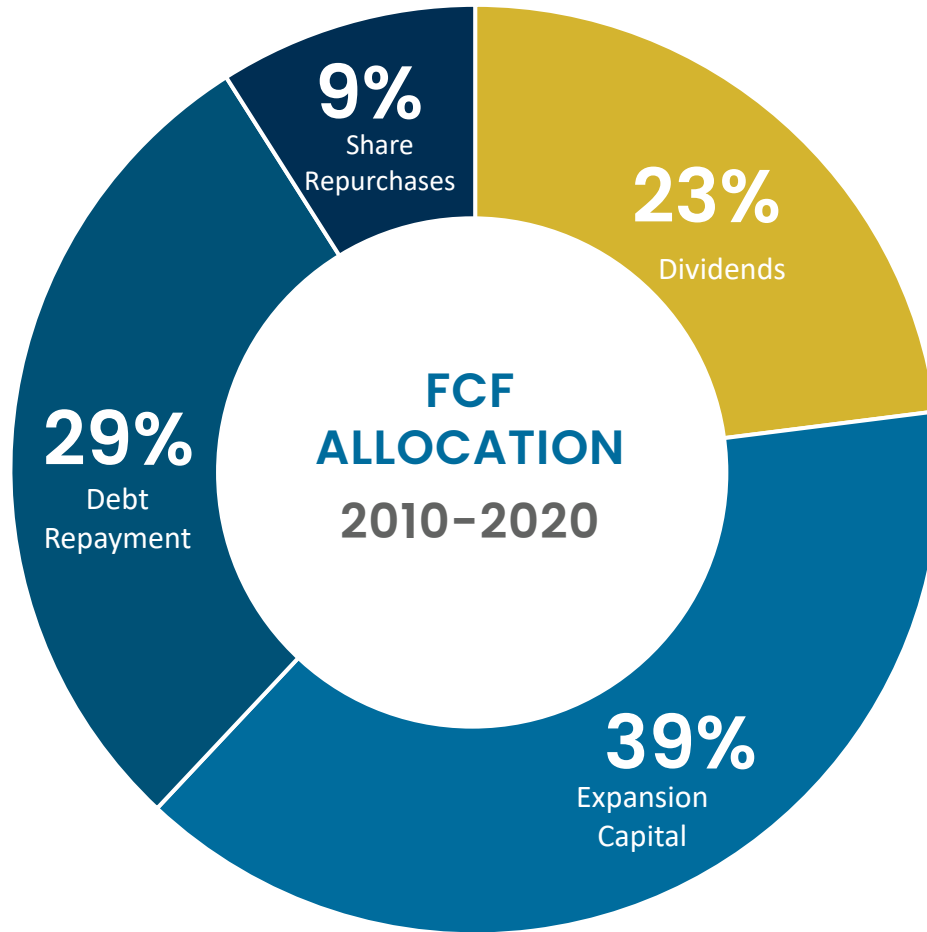

// Cash + Short Term Investments – Revolving Credit Facility Debt

Since the acquisition of Tahoe in Q1 2019, Pan American **has improved its financial position by \$492 million**, including repaying a net \$335 million of debt on the revolving credit facility.

NET CASH POSITION IN US\$ MILLIONS

PAN AMERICAN
— SILVER —

FREE CASH FLOW ALLOCATION⁽¹⁾⁽²⁾

// \$1.5B in FCF generated since 2010, returning \$499 M to shareholders³ and investing \$593 M in expansions

Cash Flow Priorities

- 1 Maintain balance sheet flexibility, with low to zero debt
- 2 Invest in high-return projects
- 3 Return to shareholders through dividends

1. Free Cash Flow is a non-GAAP measure calculated as net increase (decrease) in cash and cash equivalents before dividend payments, share repurchases, expansion capital, M&A, short term investment payments and proceeds, debt repayments and proceeds and equity issuances. See the "Non-GAAP Measures" section of our Cautionary Note on page 2 of this presentation.

2. As at December 31, 2020, generated approximately \$1.53 billion in free cash flow and allocated approximately \$1.53 billion since 2010.

3. Return to shareholders comprised of dividends + share buy-backs

PAN AMERICAN
— SILVER —

ZACATECAS, MEXICO

LA COLORADA DISCOVERY

// Large, high-grade polymetallic skarn deposit

- Deposit located adjacent and below Pan American's La Colorada vein system
- Laboratory bench-scale metallurgical tests show positive polymetallic flotation recoveries
- Advancing infill drilling, metallurgical & environmental studies, & preliminary engineering
- Targeting release of a Preliminary Economic Assessment late 2021

INFERRED MINERAL RESOURCE ESTIMATE¹

M Tonnes	Ag g/t	Cu %	Pb %	Zn %
100.4	44	0.20	1.77	4.29

1. Reported mineral resources do not include amounts identified as mineral reserves. Mineral resources that are not mineral reserves have no demonstrated economic viability. Assuming a cut-off grade of US\$60/tonne. Prices used to estimate inferred mineral resources were: US\$18.50 per ounce of silver, US\$2,600 per tonne of zinc, US\$2,200 per tonne of lead, and US\$6,500 per tonne of copper. Refer to the August 4, 2020 news release for further details. The effective date of the inferred mineral resources estimate is August 4, 2020. Mineral resources are not mineral reserves and have no demonstrated economic viability. The inferred mineral resource estimate was prepared under the supervision of, or was reviewed by, Christopher Emerson, FAusIMM, Vice President Business Development and Geology and Martin G. Wafforn, P.Eng., Senior Vice President Technical Services and Process Optimization, each of whom is a Qualified Person as that term is defined in National Instrument 43-101. Please refer to cautionary information on forward-looking statements and mineral reserve and resources on pages 2 to 4 of this presentation. For further details on the deposit including drill results, see <https://www.panamericansilver.com/operations/exploration/la-colorada-skarn/>.

PORTFOLIO ASSETS OFFERING ADDITIONAL VALUE

1

MAVERIX METALS INC. (MMX)

Pan American owns an 18% interest in this precious metals royalty and streaming company, representing a market value of CAD ~\$157 M.¹

2

NEW PACIFIC METALS CORP. (NUAG)

Pan American owns a ~9.96% undiluted interest in NUAG, which is advancing the Silver Sands exploration project in Bolivia.²

3

SHALIPAYCO PROJECT (Peru)

Pan American holds a free carried interest of 25% to commercial production in this zinc development project owned by Nexa Resources.

4

AMALIA PROJECT (Mexico)

JV agreement with Radius Gold whereby Pan American can earn an initial 65% in the project and may earn an additional 10% by completing a preliminary feasibility study.

1. Based on MMX's closing price as at Feb. 18, 2021 of \$6.15/share on the TSX.

2. Share ownership interest in NUAG on the TSX as of Feb. 17, 2021.

APPENDIX

SILVER: METAL OF THE FUTURE

// Growing industrial demand from global transition to decarbonization and electrification

- Silver has the highest electrical and thermal conductivity of all metals, making it an important metal in the transition to a low carbon economy.
- ~10% of silver supply used for photovoltaics (construction of solar panels).
- ~30% of silver supply used in electrical applications. Shift to a low carbon economy involves increase in electrical componentry, including electrical vehicles.
- Silver is an important component in the buildout of 5G networks, the next major evolution in communication technology.
- Silver has medical and sanitary applications because of its anti-bacterial properties.

Source: Silver Institute and Metals Focus, published April 22, 2020

WORLD SILVER SUPPLY & DEMAND

// 2020 estimate; in million ounces

SUPPLY

Mine production	780.1
Recycling	181.1
Other	1.2
TOTAL SUPPLY (Moz)	962.4

DEMAND

Industrial	466.5
Jewelry	153.6
Silverware	40.8
Photography	28.2
Net physical investment	236.8
TOTAL DEMAND (Moz)	930.9

Key Trends

- Silver investment rose in 2020, as investors gravitated to safe-haven investments.
- Physical investment (bars and coins) expected to rise 27% to a 5-year high
- Global holdings of silver-backed exchange-traded products (ETP) rose to a record 1.1 billion ounces YTD 2020
- The COVID-19 pandemic has resulted in an estimated reduction of mine supply (-6%) and demand for industrial fabrication (-9%) due to suspensions and low economic growth earlier in the year.
- Photovoltaics the single largest source of industrial demand while electrical applications and roll-out of 5G networks support future demand growth.
- Macro environment supportive of precious metal prices (high levels of negative yielding debt, significant fiscal/monetary stimulus and negative real rates globally). Investment demand drives the price of silver.

Total Production⁽³⁾	22.5 - 24.0	605.0 - 655.1	n/a	n/a
Consolidated AISC - Silver Basis				(2.80) - 2.70

- Cash Costs and AISC are non-GAAP measures. Please refer to the "Alternative Performance (Non-GAAP) Measures" section of this presentation for further information on these measures. Silver Segment Cash Costs and AISC are calculated net of credits for realized revenues from all metals other than silver and are calculated per ounce of silver sold. Gold Segment Cash Costs and AISC are calculated net of credits for realized silver revenues and are calculated per ounce of gold sold. Consolidated AISC is calculated per silver ounce sold with total gold revenues included within by-product credits. General and administrative ("G&A") and greenfield exploration costs are included in the consolidated AISC, but not allocated in calculating AISC for each operation. The cash costs and AISC forecasts assume average metal prices of \$23.50/oz for silver, \$1,825/oz for gold, \$2,700/tonne (\$1.22/lb) for zinc, \$1,900/tonne (\$0.86/lb) for lead, and \$7,400/tonne (\$3.36/lb) for copper; and average annual exchange rates relative to 1 USD of 20.00 for the Mexican peso ("MXN"), 3.50 for the Peruvian sol ("PEN"), 96.67 for the Argentine peso ("ARS"), 7.00 for the Bolivian boliviano ("BOB"), and \$1.30 for the Canadian dollar ("CAD").
- Morococha data represents Pan American's 92.3% interest in the mine's production. San Vicente data represents Pan American's 95.0% interest in the mine's production.
- Totals may not add due to rounding.

Escobal	20.0 - 21.0
Navidad	2.0 - 2.5

Total Care & Maintenance **22.0 - 23.5**

Corporate General & Administrative⁽¹⁾

39.0 - 42.0

1. Includes stock-based compensation.

SANTA ROSA, GUATEMALA

ESCOBAL

// One of the world's best silver mines

- High quality, well built operation with over US\$500 million invested¹
- One of the world's largest primary silver deposits with reserves of 264 Moz
- 3 consecutive years of production above 20 Moz Ag/year at AISC consistently below US\$10/oz Ag prior to 2017
- Mine operations suspended pending completion of an ILO 169 consultation by the Guatemalan government

1. Based on development, expansion, and sustaining capital invested from 2011 to 2017.

Historical Gold Production & AISC

AISC is a non-GAAP measure; see the "Non-GAAP Measures" section of our Cautionary Note on page 2 of this presentation.

Reserves & Resources

	Tonnes (Mt)	Grade				Contained Metal			
		Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Ag (Moz)	Au (koz)	Pb (kt)	Zn (kt)
P&P Reserves	24.7	334	0.35	0.79	1.30	264.5	278	196	320
M&I Resources	16.5	208	0.21	0.37	0.65	110.1	110	61	106
Inferred Resources	1.9	180	0.90	0.22	0.42	10.7	54	4	8

(as at June 30, 2020)

See presentation Appendix for more detailed information on the Company's reserves and resources.

ESCOBAL

// One of the Largest Primary Silver Deposits

Source: all information shown in the table has been obtained from CIBC World Markets, as at November 2017, and has not been independently verified by the Company.

Escobal's silver production and AISC is based on Tahoe's disclosure for 2016. Escobal has not operated since June 2017. See Escobal slide in presentation Appendix for further details. Bubble size represents silver reserves; see presentation Appendix for more detailed information on the Company's reserves and resources. AISC (US\$/oz) or all-in sustaining costs per silver ounce sold is shown net of by-product credits and considered to be a non-GAAP financial measure.

CHUBUT, ARGENTINA

NAVIDAD

// One of the largest undeveloped primary silver deposits

- 100% owned silver project located in Chubut Province, Argentina
- Project comprises 8 individual mineral deposits in 3 separate mineralized trends
- Scalable production profile with high-grade mineralization at surface
- Development contingent on provincial mining law change

Reserves & Resources

	Tonnes (Mt)	Grade			Contained Metal		
		Ag (g/t)	Cu (%)	Pb (%)	Ag (Moz)	Cu (kt)	Pb (kt)
M&I Resources	155.2	127	0.06	0.86	632.4	93	1,334
Inferred Resources	45.9	81	0.02	0.57	119.4	9	262

(as at June 30, 2020)

See presentation Appendix for more detailed information on the Company's reserves and resources.

ZACATECAS, MEXICO

LA COLORADA

// Pan American's largest silver producing mine

- 100% owned and operated by Pan American
- Underground mine located in Zacatecas, Mexico
- Expansion completed in 2017 – new mine shaft and sulphide processing plant
- Currently producing silver-gold doré bars from a conventional cyanide leach plant for the oxide ore, and silver-rich lead and zinc concentrates from a flotation plant treating sulphide ore

Silver Production (Moz)

Reserves & Resources

	Tonnes (Mt)	Grade				Contained Metal			
		Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Ag (Moz)	Au (koz)	Pb (kt)	Zn (kt)
P&P Reserves	10.1	318	0.22	1.17	2.07	103.2	72	118	209
M&I Resources	2.0	225	0.17	0.69	1.18	14.7	11	14	24
Inferred Resources	6.2	232	0.13	1.60	3.10	46.2	27	99	192

(as at June 30, 2020)

See presentation Appendix for more detailed information on the Company's reserves and resources.

CHIHUAHUA, MEXICO

DOLORES

// Large gold / silver Mine

- 100% owned and operated by Pan American in Chihuahua, Mexico
- Mining is by open pit and underground methods and uses conventional cyanide heap leaching to produce gold and silver doré
- Expansion completed in 2017 featuring a pulp agglomeration plant to process high-grade ore
- Average throughput capacity of 20,000 tpd

Silver & Gold Production

Reserves & Resources

	Tonnes (Mt)	Grade		Contained Metal	
		Ag (g/t)	Au (g/t)	Ag (Moz)	Au (koz)
P&P Reserves	36.9	23	0.87	27.7	1031
M&I Resources	2.5	13	0.40	1.1	31
Inferred Resources	3.8	43	1.14	5.3	139

(as at June 30, 2020)

See presentation Appendix for more detailed information on the Company's reserves and resources.

PASCO, PERU

HUARON

// Polymetallic silver mine

- 100% owned and operated by Pan American
- Underground mine located in Pasco, Peru
- Average throughput capacity of 2,500 tpd using flotation technology to produce silver in copper, lead, and zinc concentrates
- Mechanization of mining methods has improved efficiency and reduced operating costs
- Upgrades to the flotation circuit have resulted in improved mill recoveries

Silver Production (Moz)

Reserves & Resources

	Tonnes (Mt)	Grade				Contained Metal			
		Ag (g/t)	Cu (%)	Pb (%)	Zn (%)	Ag (Moz)	Cu (kt)	Pb (kt)	Zn (kt)
P&P Reserves	10.5	166	0.61	1.50	3.05	56.1	64	158	321
M&I Resources	4.2	158	0.42	1.65	2.93	21.4	18	69	123
Inferred Resources	5.8	157	0.45	1.55	2.83	29.0	25	89	163

(as at June 30, 2020)

See presentation Appendix for more detailed information on the Company's reserves and resources.

YAULI, PERU

MOROCCOCHA

// Polymetallic silver mine

- 92.3% owned and operated underground mine located in Yauli, Peru
- Average throughput capacity of 2,000 tpd using flotation technology to produce silver in zinc, lead, and copper concentrates
- Mechanization of mining methods has improved efficiency and reduced operating costs
- Current activities focus on opportunities to enhance productivity and efficiencies while designing for the eventual mill relocation

Silver Production (Moz)

Reserves & Resources

	Tonnes (Mt)	Grade				Contained Metal			
		Ag (g/t)	Cu (%)	Pb (%)	Zn (%)	Ag (Moz)	Cu (kt)	Pb (kt)	Zn (kt)
P&P Reserves	6.2	170	0.34	1.43	3.76	33.8	21	88	232
M&I Resources	1.5	138	0.65	0.91	2.91	6.8	10	14	45
Inferred Resources	4.8	157	0.35	1.05	3.38	24.3	17	50	162

(as at June 30, 2020)

See presentation Appendix for more detailed information on the Company's reserves and resources.

POTOSÍ, BOLIVIA

SAN VICENTE

// Polymetallic silver mine

- 95% owned and operated by Pan American
- Underground mine located in Bolivia
- Average throughput capacity of 950 tpd utilizing a standard flotation process to produce silver-zinc and silver-lead concentrates
- Mechanization efforts, enhanced mine dilution controls and improvements in site infrastructure underway to lower production costs

Silver Production (Moz)

Reserves & Resources

	Tonnes (Mt)	Grade				Contained Metal			
		Ag (g/t)	Cu (%)	Pb (%)	Zn (%)	Ag (Moz)	Cu (kt)	Pb (kt)	Zn (kt)
P&P Reserves	1.5	433	0.43	0.35	3.49	21.5	7	5	54
M&I Resources	1.4	183	0.22	0.20	2.49	8.5	3	3	36
Inferred Resources	2.7	303	0.24	0.31	3.14	25.8	6	8	83

(as at June 30, 2020)

See presentation Appendix for more detailed information on the Company's reserves and resources.

SANTA CRUZ, ARGENTINA

MANANTIAL ESPEJO

// Underground mines in Santa Cruz, Argentina

- 100% owned and operated by Pan American
- High-grade ore from Joaquin and COSE is processed at the Manantial Espejo plant
- Average throughput capacity of 2,150 tpd, treating ore by gravity concentration, agitation leaching and Merrill Crowe processing to produce silver-gold doré

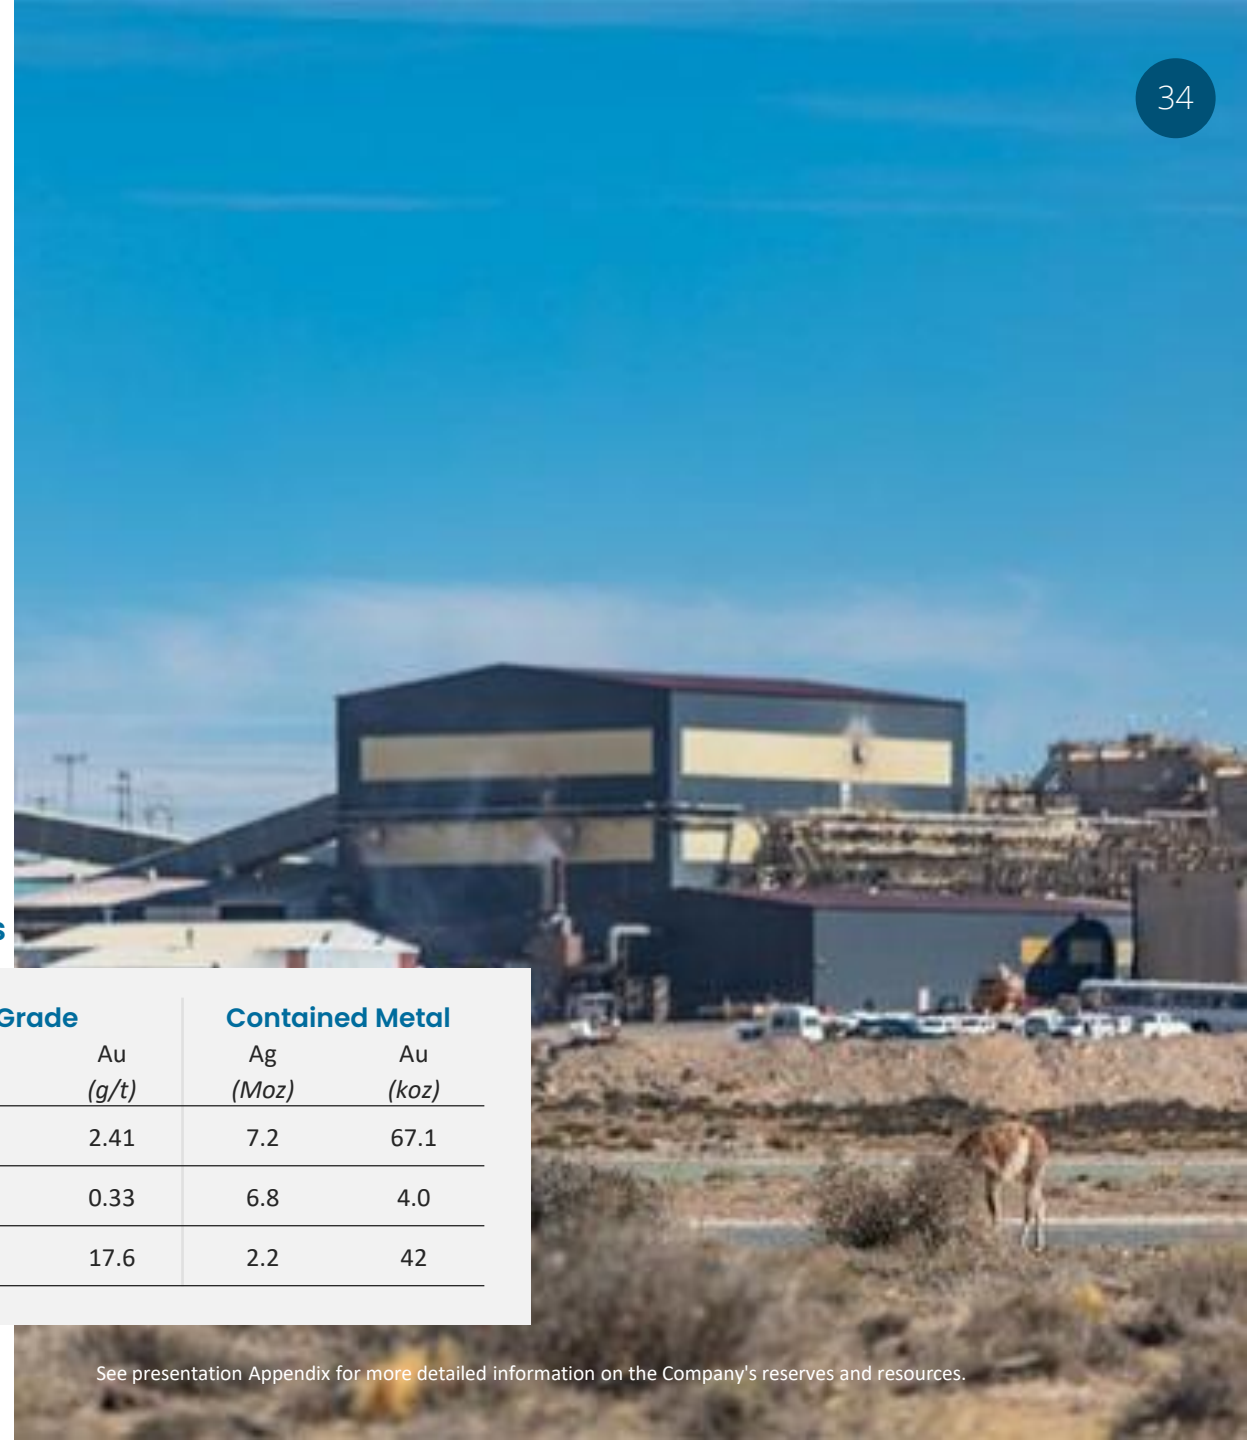

Silver Production (Moz)

Proven & Probable Reserves

	Tonnes (Mt)	Grade		Contained Metal	
		Ag (g/t)	Au (g/t)	Ag (Moz)	Au (koz)
Manantial Espejo	0.9	259	2.41	7.2	67.1
Joaquin	0.4	552	0.33	6.8	4.0
COSE	0.1	903	17.6	2.2	42

(as at June 30, 2020)

See presentation Appendix for more detailed information on the Company's reserves and resources.

CAJAMARCA, PERU

SHAHUINDO

// Large gold mine with significant growth potential

- 100% owned and operated by Pan American
- Open pit gold mine located in northern Peru producing silver by-products from doré
- Average throughput capacity of 36,000 tpd with heap leach processing
- Commercial production began in 2016
- Significant exploration potential and ability to extend mine life; discovered 406k ounces of gold in 2020

Gold Production (Moz)

2019 production and AISC results subsequent to the Feb. 22, 2019 closing date of the acquisition of Tahoe Resources Inc.

Reserves & Resources

	Tonnes (Mt)	Grade		Contained Metal	
		Au (g/t)	Ag (g/t)	Au (koz)	Ag (Moz)
P&P Reserves	124.4	0.49	6.6	1,952	26.5
M&I Resources	28.4	0.25	4.3	230	3.9
Inferred Resources	12.0	0.52	7.0	202	2.8

(as at June 30, 2020)

See presentation Appendix for more detailed information on the Company's reserves and resources.

LA LIBERTAD, PERU

LA ARENA

// Gold mine with sulphide expansion potential (La Arena II)

- 100% owned and operated by Pan American
- Open pit gold mine located in northern Peru producing doré
- Run-of-mine heap leach currently processing 36,000 tpd
- Exploration success has extended mine life
- PEA released February 2018 on sulphide expansion (“La Arena II”)

Gold Production (Koz)

2019 production and AISC results subsequent to the Feb. 22, 2019 closing date of the acquisition of Tahoe Resources Inc.

Reserves & Resources

(as at June 30, 2020)

LA ARENA	Tonnes (Mt)	Grade		Contained Metal	
		Au (g/t)		Au (koz)	
P&P Reserves	42.4	0.33		447	
M&I Resources	10.2	0.26		83	
Inferred Resources	13.3	0.24		101	

LA ARENA II	Tonnes (Mt)	Grade		Contained Metal	
		Au (g/t)	Cu (%)	Au (koz)	Cu (kt)
M&I Resources	742.4	0.24	0.35	5637	2626
Inferred Resources	91.6	0.23	0.17	683	158

See presentation Appendix for more detailed information on the Company's reserves and resources.

ONTARIO, CANADA

TIMMINS MINES

// Two producing mines in prolific Canadian mining camp

- 100% owned and operated by Pan American
- Located in Ontario, Canada and consists of two underground gold mines, Timmins West and Bell Creek, which both feed the Bell Creek mill
- Average throughput capacity of 4,400 tpd producing doré
- Shaft upgrade to 1,080 metres completed in 2019 and contributing to reduced costs
- Exploration success has extended mine life

Gold Production (Koz)

2019 production and AISC results subsequent to the Feb. 22, 2019 closing date of the acquisition of Tahoe Resources Inc.

Reserves & Resources

	Tonnes (Mt)	Grade Au (g/t)	Contained Metal Au (koz)

1. See slide entitled "Metal price assumptions used to estimate mineral reserves and resources as at June 30, 2020".
2. Mineral resource estimates were prepared under the supervision of, or were reviewed by, Christopher Emerson, FAusIMM, Vice President Business Development and Geology and Martin G. Wafforn, P.Eng., Senior Vice President Technical Services and Process Optimization, each of whom are Qualified Persons as that term is defined in National Instrument 43-101 ("NI 43-101").
3. This information represents the portion of mineral reserves attributable to Pan American based on its ownership interest in the operating entity as indicated.
4. Totals may not add up due to rounding. Total average grades of each element are with respect to those mines that produce the element.

GENERAL NOTES APPLICABLE TO THE FOREGOING TABLES:

Mineral reserves and resources are as defined by the Canadian Institute of Mining, Metallurgy and Petroleum. Pan American reports mineral resources and mineral reserves separately. Reported mineral resources do not include amounts identified as mineral reserves. Mineral resources that are not mineral reserves have no demonstrated economic viability.

Pan American does not expect these mineral reserve and resource estimates to be materially affected by metallurgical, environmental, permitting, legal, taxation, socio-economic, political, and marketing or other relevant issues. See the Company's Annual Information Form dated February 17, 2021, available at www.sedar.com for further information on the Company's material mineral properties, including information concerning associated QA/QC and data verification matters, the key assumptions, parameters and methods used by the Company to estimate mineral reserves and mineral resources, and for a detailed description of known legal, political, environmental, and other risks that could materially affect the Company's business and the potential development of the Company's mineral reserves and resources.

Grades are shown as contained metal before mill recoveries are applied.
